

Gospel Waves

**Support a Christian FM radio station
in the province of Quebec**

We and our partners want to reach over 7 million French speakers in the Province of Quebec, Canada, by setting up 100 Christian FM radio stations. 100 people or church groups who give \$600/year can make it happen.

Secular radio stations in Quebec are not usually open to including Christian content on their broadcasts. So how will over 7 million inhabitants of Quebec hear the Good News? Only 0.6% of the population has chosen to follow Christ, so few Christians are available to bring biblical teaching into their communities. Experience in other countries has shown that radio reaches where there is no Christian neighbor, no local church, and no missionary. It is a way to bring families to Christ and groups of believers together as they gather to hear God's truth explained over radio waves. Christian FM radio stations broadcasting across Quebec will get the Word out!

"When Jesus landed and saw a large crowd, he had compassion on them, because they were like sheep without a shepherd. So he began teaching them many things." Mark 6:34

Crowd in Quebec City (by Zingaro, Creative Commons)

The mother-station near Quebec City is up and broadcasting in French. This station provides the programming for all other stations that will be set up. Great teachers of the Bible are explaining God's Word and his way of salvation over the airwaves, along with good music.

A station has been built in a church in Brownsburg-Chatham, 55 miles north-west of Montreal near the Ottawa River, and is broadcasting to 85,000 households.

Ten churches are already in line for radio stations of their own. 89 more will be needed to cover all of Quebec. With an announcement about the new radio frequency, every home receives a beautifully illustrated booklet entitled *Finding Hope*, provided by partner mission Every Home for Christ.
